Company Profile

Quality

Director's Statement

With the noticeable evolution of economic entities, and the emergence of local and international organizations disseminated in different parts of Palestine, it is a prerequisite to secure these bodies with good service provision in the area of office furniture that would costume the nature of services rendered. More than twenty years of solid experience in this vivid sector in the local market, we were fully content that such sector lacks innovation and creativity, in terms of designs, and the raw materials used on one hand, and the absence of those systems adopted globally on the other hand. In other words, no consideration is being endorsed to address the place identity, and goals of the addressed entity, be it economic, or NGO, or any other type of local institutions based in the Palestinian territories. Based on the above, Smart Office was founded in 2014, to form as a tangible transformation in this sector. The company was able to fill this gap within a very short period of operation in this field, through providing swift and comprehensive solutions that address the needs of sizable projects launched in the area. An ideal investment of available spaces, and the high quality products of Smart Office were considered, of which proved to be compatible to those of European brands, in terms of designs, quality and fabrics. Mission of Smart Office is not limited to general commercial concept, it is beyond that to contribute in strengthening the Palestinian identity, as part of its national responsibility. To achieve such notion, the company has launched a product line of elite office chairs, of which holding names of Palestinian cities whether those in historic Palestine, or cities and towns based in the West Bank and Gaza Strip. Plans are endless, and aspirations are unlimited. Our future plan may lead us to a comprehensive industrial workshop, to enable us produce all clusters of office furniture including desks, meeting tables, chairs, ready-made partitions (fixed and portable), in addition to office and house blinds in one stop shop factory.

Smart Office

About us

Smart Office for Office Furniture was founded in 2014 as a private shareholding company, specialized in supply and installation of different types of office furniture. Despite the fact that the company has been founded since less than a decade, it has achieved a tangible record in this field, and was able to build bridges of confidence versus different private sector companies, and local investment entities around Palestine. This is due to the institutional values that the company was keen to maintain, of which constitutes as important factors for its existing presence in the local market. On the other hand, the high quality of its products as well as the competitive prices represent an added value to the company, through which enabled the company to win significant projects referred to the most sizable investment firms in different parts of Palestine. The company has achieved a unique distinction in its products, being assembled locally by high professional technicians and expertise, while the relevant products' components and raw materials are being imported from reputable international European firms. Thus, Smart Office products proved to be compatible to those of international products, in terms of quality, specifications and modern designs. While Smart Office emphasizes the significance of promoting the local products, the company was honored to build a network of business and cooperative relations with its local clients, an important factor behind its successful, durable, and sustainable existence.

Comfort

Mission . Vision . Values

The image features a collection of abstract, three-dimensional geometric shapes made of a textured material, possibly cardboard or paper. The shapes are arranged on a plain white background. There are several circular shapes: a large tan one at the top center, a medium brown one at the top left, a medium green one below the tan one, and a small red one at the top right. There are also several rectangular and L-shaped pieces. A light beige rounded rectangle is on the left. A brown rounded rectangle is in the center. A dark grey rounded rectangle is on the right. A light green L-shaped piece is in the middle. A yellow L-shaped piece is at the bottom left. A dark grey L-shaped piece is at the bottom right. A small cluster of three grey circles is at the top right. All shapes have soft shadows cast to the right, suggesting a light source from the left. The word "colorful" is written in a simple, black, sans-serif font on the left side of the image.
